1. Introduction

1.1 Background and Objectives of XBRL Development at Indonesia Stock Exchange

In accordance with capital markets growth in Indonesia, demands for financial information and related disclosures are becoming more complex and increases in volume. Stakeholders, including analysts and investors, require improvements for readily available information which can be processed and utilized quickly and efficiently. It is expected that when all information is presented in a common format, these improvements can be achieved. In addition, to support and facilitate Business Intelligence at Indonesia Stock Exchange, and to provide investors and regulators with informative data for quick decision making, an integrated solution for standardized reporting is needed.

Currently, financial reports filed by the issuers are submitted through IDXnet, a web-based reporting gateway for Issuers. The majority of data sent by the issuers cannot be fully utilized because of the following challenges:

- a. Detailed information, such as supplements, is only contained in PDF format and submitted as attachments;
- b. Different varieties of reporting, in terms of the presentation structure among different issuers; and
- c. Manual data validation process.

These challenges create obstacles, especially for analysts and investors, in extracting data and information quickly and accurately.

Therefore, in order to address these challenges, an XBRL-based reporting method will be implemented to standardize reporting formats, which will enhance and simplify data processing.

The function of XBRL is to diminish differences and create a consistent and comparable reporting format which is intended to make data processing easier for data users. When all reports are presented in the same format, the information can be easily utilized.

In order to enhance IDX's continuous monitoring efforts of listed issuers, and providing prompt response for listed issuers, a fast, reliable and informative data processing is needed. These enhancements are needed at IDX because of the recent growth in capital market activities:

- a. Increasing number of registered issuers at Indonesia Stock Exchange;
- b. Complexity and dynamics of corporate actions;
- c. More varieties of reporting and disclosure of information received; and
- d. More diverse marketable securities and types of listed companies.

XBRL will also be beneficial for supporting capital market information transparency because of:

- a. The need for reliable and dependable market information of the listed companies for the investors and the market; and
- b. Constraints of language differences and standards for global investors over Listed Company's financial information can be bridged by adoption of XBRL.

1.2 Developments of XBRL at Indonesia Stock Exchange

Since 2012, Indonesia Stock Exchange has initiated the development of XBRL-based reporting. In an effort to implement reporting using XBRL, IDX have prepared and built a taxonomy that will exclusively used in reporting. As the initial development step, IDX has completed specialized taxonomy for corporate financial statements. Furthermore, the taxonomy of financial reports will be disseminated to all Listed Companies. IDX plans to implement XBRL-based reporting in 2015.

The type of taxonomy of the existing financial statements includes:

- a. Statement of Financial Position
- b. Statement of Comprehensive Income
- c. Statement of Changes in Equity
- d. Statement of Cash Flow

This taxonomy will standardize all financial statements presentation formats from all sectors and sub-sectors that have been pre-defined by the Stock Exchange.

2. IDX Taxonomy 2020

2.1 General Information on IDX Taxonomy 2020

The IDX Taxonomy 2020 contains taxonomy for financial statements and is intended to be utilized for future financial reporting by listed issuers at the exchange.

Below is an overview of the IDX Taxonomy 2020.

Name:	Indonesia Stock Exchange (IDX) Taxonomy 2020
Date issued:	01 January 2020
Status:	Final
Publisher:	Indonesia Stock Exchange (IDX)
Scope:	<p>IDX Taxonomy 2020 contains financial statements elements, including Statement of Financial Position, Statement of Comprehensive Income, Statement of Cash Flow and Statement of Changes in Equity, that were prepared in accordance with the following references and regulations:</p> <ol style="list-style-type: none"> 1. Indonesian Generally Accepted Accounting Principles or Pernyataan Standar Akuntansi Keuangan (PSAK); 2. Statement of Sharia Accounting Standard; 3. Provisions on Capital Market regulations: <ol style="list-style-type: none"> a) Indonesian Capital Market & Financial Institution Supervisory Agency (Bapepam dan LK) No. VIII.G.7 on presentation and disclosure requirements for financial statements prepared by publicly listed entities in Indonesia; b) Bapepam dan LK No. VIII.G.17 regulation on accounting guidelines for securities company;

-
- c) Bapepam dan LK No. SE-17/BL/2012 circular on financial statement disclosure checklist for the Indonesian capital market industry.

2.2 Version information

IDX Taxonomy 2020 is the first taxonomy that was developed by Indonesia Stock Exchange.

2.3 References used in creating IDX Taxonomy 2020

The overall format of the financial statements in the IDX taxonomy has been prepared through a review process of taking samples on 188 listed company's financial statements, or representing 35% of all listed companies.

IDX Taxonomy 2020 was built using several references and rules as follow:

- Statement of Financial Accounting Standards (PSAK);
- Statement of Financial Accounting Standards (ETAP)
- Statement of Sharia Accounting Standards;
- Provision on Capital Market regulations:
 - Financial Services Authority Rule No. VIII.G.7 about The Guidelines of Financial Report Presentation;
 - Financial Services Authority Rule No. VIII.G.17 about The Accounting Guidelines of Securities Companies;
 - Financial Services Authority Circular Letter No. SE-17/BL/2012 about checklist of Financial Statement Disclosure for All Industries in Indonesia Capital Market.

2.4 Detailed explanations on IDX Taxonomy 2020

A. Reporting forms

IDX Taxonomy 2020 represents financial statements to be used for reporting which were prepared based on the Indonesian Financial Accounting Standard or PSAK. The taxonomy contains the following reporting forms:

1. Document Entity Information (DEI)

Contains information of the reporting entity and the document reported

2. Financial Statements

2.1 Statement of Financial Position

Based on PSAK 1, the statement of financial position can be presented based on current and non-current, and liquidity.

2.2 Statement of Comprehensive Income

Reporting Expenses on the statement of comprehensive income, based on PSAK 1, must be done based on the function or nature of the expense. In addition, they must then be allocated based on before tax and after tax.

2.3 Statement of Changes in Equity

2.4 Statement of Cash Flow

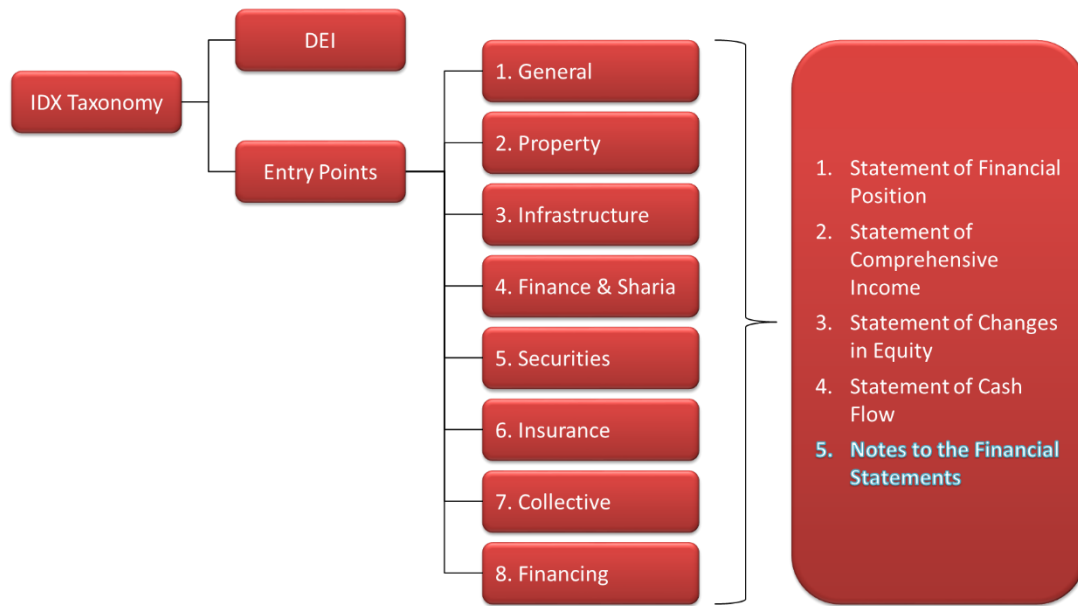

Reporting cash flow from operations must be allocated based on direct method and indirect method.

B. Entry Points

The purpose of Entry Points is to separate reports into different categories. Because of the varieties of accounts across different industries, Indonesia Stock Exchange created eight entry points in the IDX taxonomy to simplify reporting. These Entry points are as follows:

1. General
2. Property
3. Infrastructure
4. Financial and Sharia
5. Securities
6. Collective Investment Contract
7. Insurance
8. Financing

Illustration of the IDX Taxonomy 2020

These entry points were determined based on industry classifications used by Indonesia Stock Exchange. There are currently nine industry sectors with 56 sub-sectors. The table on the next page is an illustration of the sectors and subsectors mapping that correspond with the taxonomy entry points.

Table of Sector and Sub Sector Mapping with Entry Point

Sector	Sub Sector	Entry Point
1. AGRICULTURE	11.CROPS	General / Umum
	12.PLANTATION	
	13.ANIMAL HUSBANDRY	
	14.FISHERY	
	15.FORESTRY	
2. MINING	19.OTHERS	General / Umum
	21.COAL MINING	
	22.CRUDE PETROLEUM & NATURAL GAS PRODUCTION	
	23.METAL AND MINERAL MINING	
	24.LAND / STONE QUARRYING	
3. BASIC INDUSTRY AND CHEMICALS	29.OTHERS	General / Umum
	31.CEMENT	
	32.CERAMICS, GLASS, PORCELAIN	
	33.METAL AND ALLIED PRODUCTS	
	34.CHEMICALS	
	35.PLASTICS & PACKAGING	
	36.ANIMAL FEED	
	37.WOOD INDUSTRIES	
4. MISCELLANEOUS INDUSTRY	38.PULP & PAPER	General / Umum
	39.OTHERS	
	41.MACHINERY AND HEAVY EQUIPMENT	
	42.AUTOMOTIVE AND COMPONENTS	
	43.TEXTILE, GARMENT	
	44.FOOTWEAR	
5. CONSUMER GOODS INDUSTRY	45.CABLE	General / Umum
	46.ELECTRONICS	
	49.OTHERS	
	51.FOOD AND BEVERAGES	
	52.TOBACCO MANUFACTURERS	
6. PROPERTY, REAL ESTATE AND BUILDING CONSTRUCTION	53.PHARMACEUTICALS	Property / Properti (juga bagian dari General / Umum)
	54.COSMETICS AND HOUSEHOLD	
	55.HOUSEWARE	
	59.OTHERS	
7. INFRASTRUCTURE, UTILITIES AND TRANSPORTATION	61.PROPERTY AND REAL ESTATE	Infrastructure / Infrastruktur (juga bagian dari General / Umum)

	69.OTHERS	
	71.ENERGY	
	72.TOLL ROAD, AIRPORT, HARBOR AND ALLIED PRODUCTS	
8. FINANCE	73.TELECOMMUNICATION	Keuangan dan Syariah / Financial and Sharia Pembiayaan / Financing Sekuritas / Securities Asuransi / Insurance Kontrak Investasi Kolektif / Collective Sesuai Nature bisnis
	74.TRANSPORTATION	
	75.NON BUILDING CONSTRUCTION	
	79.OTHERS	
	81.BANK	
	82.FINANCIAL INSTITUTION	
9. TRADE, SERVICES & INVESTMENT	83.SECURITIES COMPANY	General / Umum
	84.INSURANCE	
	85.INVESTMENT FUND / MUTUAL FUND	
	89.OTHERS	
	91.WHOLESALE (DURABLE & NON-DURABLE GOODS)	
	93.RETAIL TRADE	
	94.TOURISM, RESTAURANT AND HOTEL	
	95.ADVERTISING, PRINTING AND MEDIA	
96.HEALTHCARE		
97.COMPUTER AND SERVICES		
98.INVESTMENT COMPANY		
99.OTHERS		

C. Document Entity Information (DEI)

Document Entity Information contains general information of the reporter and the reports submitted. The DEI is the same for all entry points. The information contained in the DEI is shown in the table below.

No	Element
1	General information [abstract]
2	Entity name
3	Explanation of change in name from the end of the preceding reporting period
4	Entity code
5	Entity identification number
6	Entity main industry
7	Sector
8	Subsector
9	Controlling shareholder information
10	Type of entity
11	Type of listed securities
12	Type of board on which the entity is listed
13	Whether the financial statements are of an individual entity or a group of entities
14	Period of financial statements submissions
15	Current period start date
16	Current period end date
17	Prior year end date
18	Prior period start date
19	Prior period end date
20	Description of presentation currency
21	Conversion rate at the reporting date if the presentation currency is not Rupiah
22	Level of rounding used in financial statements
23	Type of report on financial statements
24	Type of auditor's opinion
25	Matters disclosed in emphasis-of-matter or other-matter paragraph, if any
26	Result of review engagement
27	Date of auditor's opinion or result of review report
28	Current year auditor
29	Name of current year audit signing partner
30	Number of years served as audit signing partner
31	Prior year auditor
32	Name of prior year audit signing partner
33	Whether in compliance with BAPEPAM LK VIII G 11 rules concerning responsibilities of board of directors on financial statements
34	Whether in compliance with BAPEPAM LK VIII A two rules concerning independence of accountant providing audit services in capital market

D. Financial Statements

Each report refers to the corresponding presentation link. Below is a detailed explanation for the presentation link within the IDX Taxonomy 2020. The table below can be used as a reference for the forms being used. For example, if one is completing a cash flow statement with direct method for the infrastructure entry point, therefore the reference number is 3510000.

Presentation Links on IDX Taxonomy 2020

No	Entry Point	DEI	Statement of Financial Position		Statement of Comprehensive Income				Statement of Changes in Equity	Statement of Cash Flow	
			Current and Non-current	Liquidity	By Function		By Nature			Direct Method	Indirect Method

Disclosure of Notes for Temporary Syirkah Funds	n/a	n/a	n/a	4626110	n/a	n/a	n/a	n/a

For a detailed list of the accounts, please see Appendix B.

E. Validation

To ensure data validity in the instance document, a validation process is required. This validation is processes using calculation link and formula. If the validation process detects errors, the data in the instance document needs to be corrected prior to filing.

1. Calculation Linkbase

The Calculation linkbase will perform data validation on one form (either one of the financial statements) by processing the calculation. This process checks the data by adding the data and multiply by weight, and validate the relationship between the entered data and the calculated data.

As an example, the Calculation Linkbase will validate Gross profit, which can be defined as:

Gross profit = Sales and revenue – Cost of sales and revenue

Therefore, the Calculation Linkbase will validate the entered value of Gross profit against the calculated value of Gross profit. If they do not match, an error message will pop-up.

Example of Data Validation Using Calculation Linkbase for Gross Profit Calculation

Item		Value		Weight		Result
Sales and revenue	CR	6.160.214.023.204	*	1	=	6.160.214.023.204
Cost of sales and revenue	DR	3.339.267.470.227	*	-1	=	-3.339.267.470.227
Gross profit	CR	2.520.946.552.977				2.820.946.552.977

The Calculation linkbase has some limitations as follows:

- a. Does not validate between contexts, between period (*duration*) and a certain date (*instant*).

For example, On Statement of Cash Flow, there are values that represents a position for a certain date (instant), such as Cash and Cash Equivalents at beginning and end of the period, and there are values that represents a period (duration), such as Net cash flows received from (used in) operating activities.

- b. Cannot be used between different types of financial statements

The Calculation Linkbase can only validate on the same financial statement and cannot be used between different types of reports. For example, validating elements/data between Statement of Financial Position and Statement of Comprehensive Income.

In IDX Taxonomy 2020, the Calculation Linkbase is part of the taxonomy which will perform validation between each component that are contained in the reports, to ensure that the data being submitted is valid.

2. Formula

The formula can overcome the limitations that exist in Calculation Linkbase, because the formula can validate between contexts and between types of statements/reports. Although the Formula is separate from the taxonomy, it is used to perform validation of data in an instance document. The formula is also used to validate the following assertions:

- a. *Existence Assertion*

To ensure that required information has been filled. For example, assertion for Name of Entity in the DEI will check if the information has been provided or not. If the information for Name of Entity is not filled, the Formula will generate an error message.

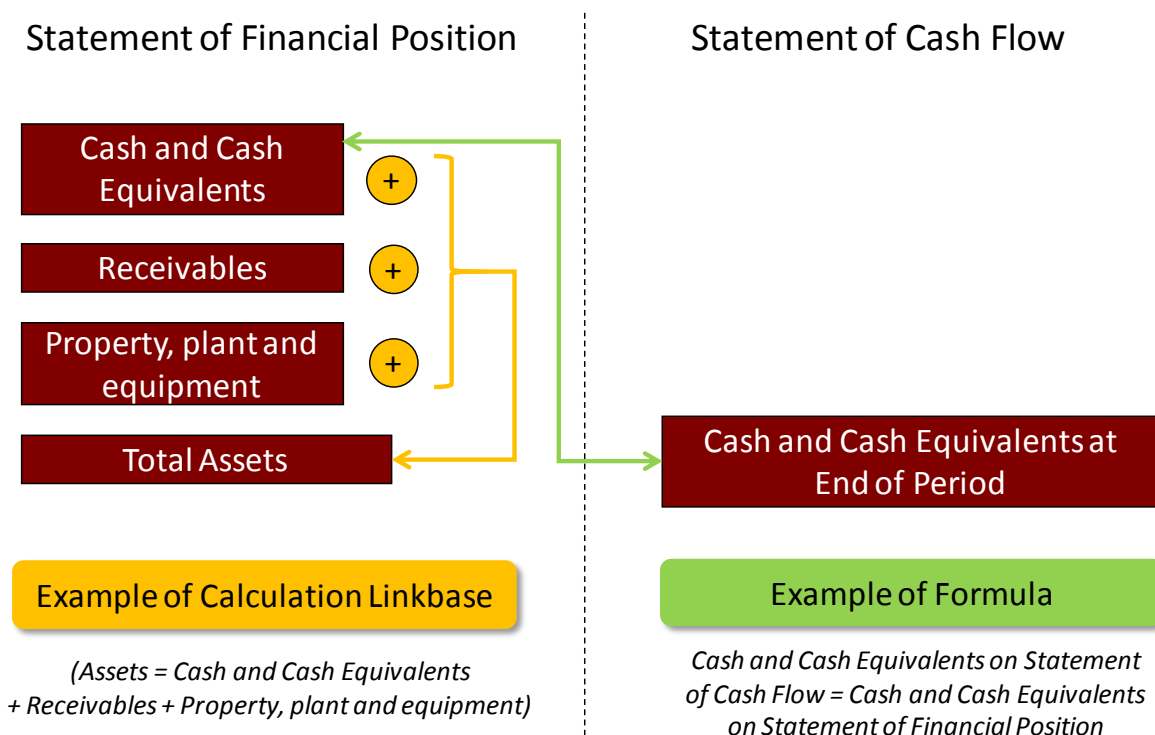

- b. *Value Assertion*

Value Assertion has the same function as Calculation Linkbase, but it can also validate between contexts and types of statements/reports. For example, if the value of Cash and

Cash Equivalents on the Statement of Financial Position is not equal to the value of Cash and Cash Equivalents on the Statement of Cash Flow, the Formula will generate an error message.

In IDX Taxonomy 2020, the Formula is used to ensure data validation is done in one form or between forms and ensure that the data is valid.

Example of Calculation Linkbase and Formula

E. Current XBRL Specification Versions

The XBRL specifications of IDX Taxonomy 2020 are as follows:

1. XBRL 2.1, dated 2003-12-31 [with errata corrections to 2013-02-20]
2. Dimensions 1.0 [with Errata corrections to 2012-01-25]
3. Formula 1.0 [2009-2013]

F. Logic Architecture

The IDX Taxonomy 2020 is divided into two different layers of architecture; these layers are Report Layer and Dictionary Layer. An Entry Point schema will connect components in these layers.

1. Dictionary Layer

The Dictionary Layer contains a dictionary for all elements required in the taxonomy. The Dictionary Layer is divided into 3 layers:

a. Dictionary Schema (cor)

The Dictionary schema contains all elements or accounts, including the references and corresponding labels for each of the elements.

b. Roletype Schema

Roletype Schema contains the definitions for the roletype schema, for example, [1510000] Statement of Cash Flow, direct method – General Industry, which is required in the taxonomy.

c. DEI Schema (rt)

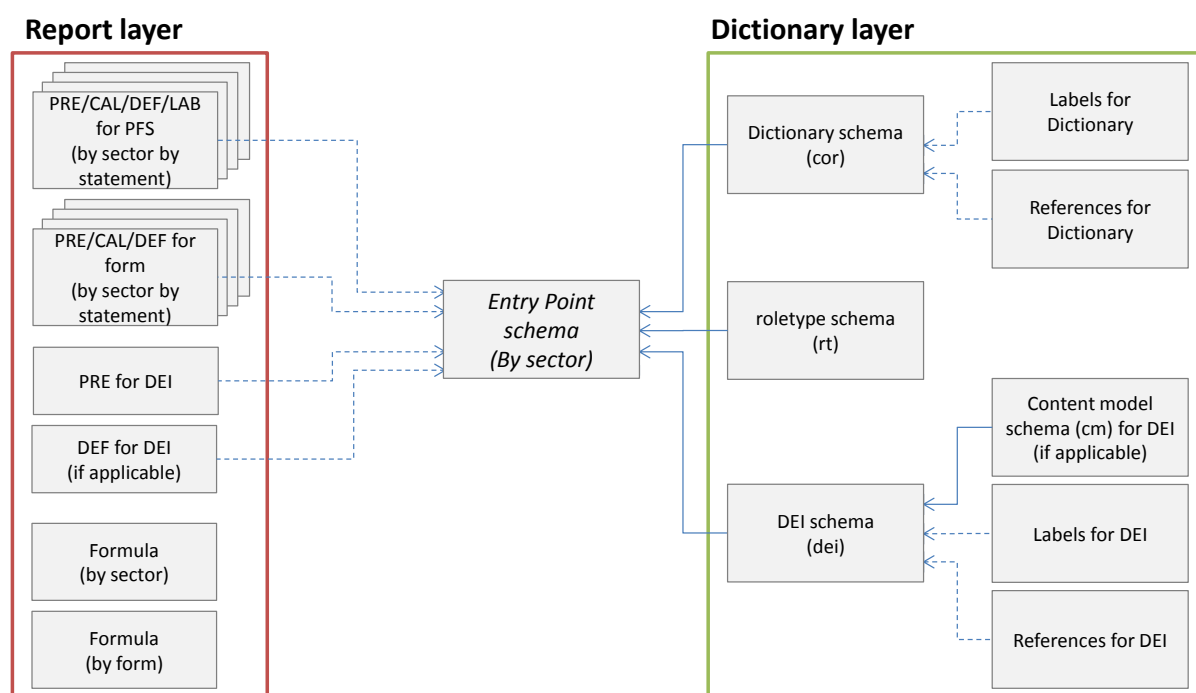

DEI Schema (rt) contains the definitions for the reporting elements or components on the DEI.

2. Report Layer

The Report Layer connects the elements contained in the Dictionary and produce a business report. The Dictionary Layer will not be able to produce business reports without the Report Layer. For example, on the statement of financial position, the elements, such as assets or current assets, are retrieved from the Dictionary.

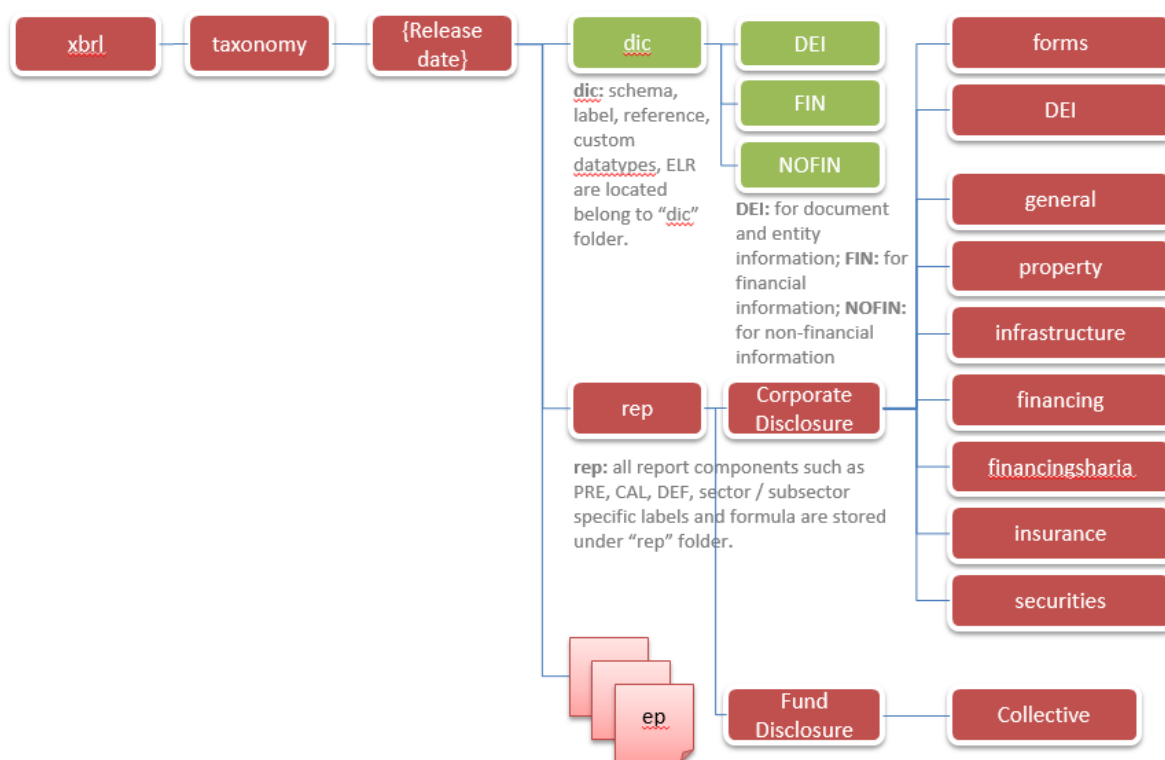

3. Entry Point

Contains the 8 entry points that have been predefined.

G. Folder Structure

The folder structure within the IDX Taxonomy 2020 is divided into two folders, dic (dictionary) and rep (report), to accommodate business needs and logic architecture. Separate from these folders are the entry points that connect the two folders.

1. dic

Dic or Dictionary that contains the definitions for the elements within the taxonomy, which is divided into 3 folders:

DEI – contains DEI elements

FIN – contains financial elements

NOFIN – contains non-financial elements, which is unavailable at this time.

2. rep

Rep or Report contains all of the reports, presentations, calculations and definition linkbases. Their function is similar with the report on the logic architecture.

3. Ep

Ep is the 8 *entry point* that was made to simplify the reporting process by classifying data required for each entry point.

The release date folder, as shown on the illustration above, contains the Information version of the taxonomy. Therefore, on future updates on the taxonomy, the components in the taxonomy will be refreshed and the version number will be updated. The physical folder of the taxonomy is located online at <http://www.idx.co.id/xbrl/taxonomy/2020-04-30>.

3. Public Review

Public Review on the proposed IDX taxonomy 2020 was conducted from February 27, 2020 until February 28, 2020. The purpose of the Public Review is to introduce IDX Taxonomy and its development planning to listed companies, regulators, public accountants, data vendors and the public, and to obtain comments and feedback concerning the proposed IDX Taxonomy 2020. IDX received a total of 961 comments from 269 Issuers participated in the public review process.

The feedback collected was used to make updates for the finalization of IDX Taxonomy 2020. As much as 101 elements were updated or added. The public review was also conducted as part of the steps in submitting IDX Taxonomy 2020 for recognition status from XBRL International, a consortium of companies and agencies worldwide working together to build XBRL language and promote its adoption. The purpose of taxonomy recognition is to ensure that IDX taxonomy has been established according to XBRL International’s specifications and in compliance with internationally accepted taxonomy standards. Part of the requirements in the taxonomy recognition process is to collect public feedback from issuers, regulators, and other stakeholders regarding the taxonomy which has been created by IDX.

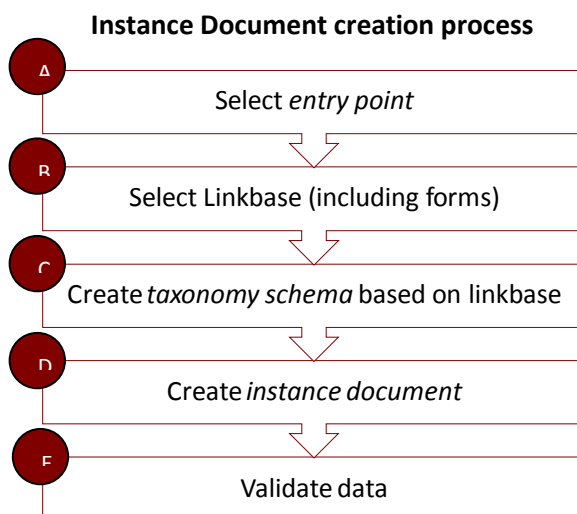

Below is a summary on the updates made to the proposed taxonomy after public review.

Added / Renamed Elements per Entry Point

4. Creating *Instance Document*

Instance Document is the format in which the reporting in XBRL is submitted, and it contains the financial data and information being reported. The process of creating an instance document is illustrated below.

Instance Document creation (Demo)

PT Test Tbk, a company that operates in the basic and chemicals sector and in the pulp & paper sub-sector, needs to submit financial report for the year 2012. PT Test Tbk will need to follow the steps of creating the required instance document for XBRL reporting. These steps are explained below.

A. Selecting the entry point

The instance document creation process begins with selecting the entry point that fits the industry or sector in which your company operates. The corresponding entry point can be selected by referring to the sector and subsector mapping table shown on the next page. For example, PT Test Tbk operates in the basic and chemicals industry, therefore the appropriate entry point for this particular company is the *General* entry point.

Table of Entry Point selection by PT Test Tbk

Sector	Sub Sector	Entry Point
1. AGRICULTURE	11.CROPS	General / Umum
	12.PLANTATION	
	13.ANIMAL HUSBANDRY	
	14.FISHERY	
	15.FORESTRY	
	19.OTHERS	
2. MINING	21.COAL MINING	General / Umum
	22.CRUDE PETROLEUM & NATURAL GAS PRODUCTION	
	23.METAL AND MINERAL MINING	
	24.LAND / STONE QUARRYING	
	29.OTHERS	
3. BASIC INDUSTRY AND CHEMICALS	31.CEMENT	General / Umum
	32.CERAMICS, GLASS, PORCELAIN	
	33.METAL AND ALLIED PRODUCTS	
	34.CHEMICALS	
	35.PLASTICS & PACKAGING	
	36.ANIMAL FEED	
	37.WOOD INDUSTRIES	
38.PULP & PAPER		
	39.OTHERS	
4. MISCELLANEOUS INDUSTRY	41.MACHINERY AND HEAVY EQUIPMENT	General / Umum
	42.AUTOMOTIVE AND COMPONENTS	
	43.TEXTILE, GARMENT	
	44.FOOTWEAR	
	45.CABLE	
	46.ELECTRONICS	
5. CONSUMER GOODS INDUSTRY	49.OTHERS	General / Umum
	51.FOOD AND BEVERAGES	
	52.TOBACCO MANUFACTURERS	
	53.PHARMACEUTICALS	
	54.COSMETICS AND HOUSEHOLD	
6. PROPERTY, REAL ESTATE AND BUILDING CONSTRUCTION	55.HOUSEWARE	Property / Properti (juga bagian dari General / Umum)
	59.OTHERS	
	61.PROPERTY AND REAL ESTATE	
	62.BUILDING CONSTRUCTION	
7. INFRASTRUCTURE, UTILITIES AND TRANSPORTATION	69.OTHERS	Infrastructure / Infrastruktur (juga bagian dari General / Umum)
	71.ENERGY	
	72.TOLL ROAD, AIRPORT, HARBOR AND ALLIED PRODUCTS	
	73.TELECOMMUNICATION	
	74.TRANSPORTATION	
	75.NON BUILDING CONSTRUCTION	
8. FINANCE	79.OTHERS	Keuangan dan Syariah / Financial and Sharia Pembiayaan / Financing Sekuritas / Securities Asuransi / Insurance Kontrak Investasi Kolektif / Collective Sesuai Nature bisnis
	81.BANK	
	82.FINANCIAL INSTITUTION	
	83.SECURITIES COMPANY	
	84.INSURANCE	
	85.INVESTMENT FUND / MUTUAL FUND	
9. TRADE, SERVICES & INVESTMENT	89.OTHERS	General / Umum
	91.WHOLESALE (DURABLE & NON-DURABLE GOODS)	
	93.RETAIL TRADE	
	94.TOURISM, RESTAURANT AND HOTEL	
	95.ADVERTISING, PRINTING AND MEDIA	
	96.HEALTHCARE	
	97.COMPUTER AND SERVICES	
98.INVESTMENT COMPANY		
99.OTHERS		

B. Selecting the *Linkbase* (including Form)

After selecting the appropriate entry point, PT Test Tbk will need to select five corresponding reporting forms based on the characteristics of the reports being reported. These forms are explained below. Detailed descriptions for each of the links are shown in Appendix B.

1. DEI (Document Entity Information)

DEI [100000], is used for reporting DEI. Each of the *entry point* reports the same item, which is the [1000000] General information. Therefore, PT Test Tbk will report the DEI using the [1000000] *General information Linkbase*.

2. Statement of Financial Position

Statement of Financial Position [1210000], is used for reporting statement of financial position. It has two types of selection based on the applied accounting standards; Current and Non-current, and Liquidity. Since PT Test Tbk is reporting its financial position based on Current and Non-current methods, therefore the Presentation Link selected is [1210000] *Statement of financial position presented using current and non-current - General Industry Linkbase*.

3. Statement of Comprehensive Income

Statement of Comprehensive Income based on after tax function [1210000], based on PSAK 1 regulation, posting the expenses on the statement of comprehensive income can be entered by function or by nature. In addition, comprehensive income after tax can be entered as after tax or before tax. Since the statement of comprehensive income is categorized into four types, PT Test Tbk may submit the financial report based on the function and report tax as other comprehensive income after tax. Therefore, PT Test Tbk will select the [1311000] *Statement of comprehensive income, OCI components presented net of tax, by function - General Industry Linkbase*.

4. Statement of Changes in Equity

Statement of Changes in Equity [1410000]. Each of the *entry point* only has one statement of changes in equity. Since PT Test Tbk uses the General entry point, therefore PT Test Tbk will select the [1410000] *Statement of changes in equity - General Industry Linkbase*.

5. Statement of Cash Flow

Statement of Cash Flow – Direct Method [1510000].

The statement of cash flow from operations can prepared using the direct method except for the collective investment contract which can still be prepared using the indirect method. Since PT Test Tbk uses the General entry point, Therefore, PT Test Tbk will use the [1510000] *Statement of cash flows, direct method - General Industry*.

6. Notes for Financial Statement

The Notes for Financial statement based is selected based on selecting link base.

Table of Presentation Link selection by PT Test Tbk

No	Entry Point	DEI	Statement of Financial Position		Statement of Comprehensive Income				Statement of Changes in Equity	Statement of Cash Flow	
			Current and Non-current	Liquidity	By Function		By Nature			Direct Method	Indirect Method
					After Tax	Before Tax	After Tax	Before Tax			
1	General	1000000	2210000	1220000	3311000	1321000	1312000	1322000	4410000	5510000	N/A
2	Property	1000000	2210000	2220000	2311000	2321000	2312000	2322000	2410000	2510000	N/A
3	Infrastructure	1000000	3210000	3210000	3311000	3321000	3312000	3322000	3410000	3510000	N/A
4	Financial and Sharia	1000000	N/A	4220000	N/A	N/A	4312000	4322000	4410000	4510000	N/A
5	Securities	1000000	N/A	5220000	5311000	5321000	N/A	N/A	5410000	5510000	N/A
6	Insurance	1000000	N/A	6220000	N/A	N/A	6312000	6322000	6410000	6510000	N/A
7	Collective Investment Contract	1000000	N/A	7220000	N/A	N/A	7312000	7322000	7410000	7510000	7520000
8	Financing	1000000	N/A	8220000	N/A	N/A	8312000	8322000	8410000	8510000	N/A

Note: Detailed description for each of the links is shown in Appendix B of this Handbook.

Description	Industry

In addition to the presentation links, other relevant linkbase may also be selected to present the report being reported.

C. Creating Taxonomy Schema based on the Linkbase Selected

After completing the linkbase selections (presentation link, calculation link, label link, definition link), a reporting schema is created. Below is an example of a Schema for PT Test Tbk financial reports for the year 2012.

Example of Schema Test2012-12-31.xsd

Creating Instance Document

Instance document is created by completing the data into the selected template.

1. Entering DEI information

All reports must begin with entering data into the DEI form. The DEI form is identical for all entry points. An example of a completed DEI form is shown below.

DEI form for PT Test Tbk

General information [abstract]	
Entity name	PT. Test Tbk
Explanation of change in name from the end of the preceding reporting period	
Entity code	TEST
Entity identification number	111
Entity main industry	Umum / General
Sector	3. Basic Industry And Chemicals
Subsector	38. Pulp & Paper
Controlling shareholder information	National Corporation
Type of entity	Local Company - Indonesia Jurisdiction
Type of listed securities	Saham / Stock
Type of board on which the entity is listed	Utama / Main
Whether the financial statements are of an individual entity or a group of entities	Entitas grup / Group entity
Period of financial statements submissions	Tahunan / Annual
Current period start date	1/1/2012
Current period end date	12/31/2012
Prior year end date	12/31/2011
Prior period start date	1/1/2011
Prior period end date	12/31/2011
Description of presentation currency	Rupiah / IDR
Conversion rate at reporting date if presentation currency is other than rupiah	
Level of rounding used in financial statements	Satuan Penuh / Full Amount
Type of report on financial statements	Diaudit / Audited
Type of auditor's opinion	Wajar Tanpa Pengecualian / Unqualified
Matters disclosed in emphasis-of-matter or other-matter paragraph, if any	
Result of review engagement	
Date of auditor's opinion or result of review report	3/25/2013
Current year auditor	Public Accountant A
Name of current year audit signing partner	John Doe
Number of years served as audit signing partner	
Prior year auditor	Public Accountant B
Name of prior year audit signing partner	Alice and Bob
Whether in compliance with BAPEPAM LK VIII G 11 rules concerning responsibilities of board of directors on financial statements	Ya / Yes
Whether in compliance with BAPEPAM LK VIII A two rules concerning independence of accountant providing audit services in capital market	

2. Complete the financial data (“Tagging”)

The financial data will be entered using the appropriate template which has been pre-selected. The tagging or mapping process is done simultaneously when entering the financial data into the template. The financial data on the financial report is entered into the appropriate elements or accounts in the template. In a situation when an account in the template does not exactly match with the account on the financial report, please select an account that closely represents that information. For example, the illustration below demonstrates the tagging process of PT Test Tbk’s Statement of Financial Position.

Example of Tagging/Mapping Current Assets elements on PT Test Tbk Statement of Financial Position into the elements in the Taxonomy

Financial Statement of PT Test Tbk			Elements in the Taxonomy		
	2012-12-31	2011-12-31		2012	2011
Statement of financial position			Statement of financial position [abstract]	(Abstract)	(Abstract)
Assets			Assets [abstract]	(Abstract)	(Abstract)
Current assets			Current assets [abstract]	(Abstract)	(Abstract)
Cash and cash equivalents	Rp 3,337,357,407,919	Rp 2,174,560,697,339	Cash and cash equivalents	3.337.357.407.919	2.174.560.697.339
Current restricted funds	500,000,000,000	500,000,000,000	Notes receivable	-	-
Current financial assets			Short-term investments	-	-
Other current financial assets	3,603,435,991,596	1,671,821,100,562	Current restricted funds	500.000.000.000	500.000.000.000
Trade receivables			Current financial assets [abstract]	(Abstract)	(Abstract)
Trade receivables third parties	591,205,993,335	561,856,099,019	Current financial assets at fair value through profit or loss	-	-
Trade receivables related parties	3,171,020,453	2,779,461,708	Current financial assets held-to-maturity investments	-	-
Current finance lease receivables	500,000,000,000	500,000,000,000	Current financial assets available-for-sale	-	-
			Other current financial assets	3.603.435.991.596	1.671.821.100.562
			Current derivative financial assets	-	-
			Trade receivables [abstract]	(Abstract)	(Abstract)
			Trade receivables third parties	591.205.993.335	561.856.099.019
			Trade receivables related parties	3.171.020.453	2.779.461.708
			Current finance lease receivables	500.000.000.000	500.000.000.000
			Retention receivables [abstract]	(Abstract)	(Abstract)
			Retention receivables third parties	-	-
			Retention receivables related parties	-	-

The tagging process is required for all data in the financial reports (Statement of Financial Position, Statement of Comprehensive Income, Statement of Changes in Equity, and Statement of Cash Flow). All financial data in the financial reports must be entered into the elements in the taxonomy.

D. Data Validation

In an effort to ensure that all of the financial data and information in the instance documents are correct and valid, a validation process is performed by utilizing the calculation link and formula. If an error is found on the instance document, the data in the instance document must be corrected accordingly.

**Example of PT Test Tbk Input Error on the Gross Profit
which is detected by the Calculation Link**

Before correction

Item		Value		Weight		Result
Sales and revenue	CR	6.160.214.023.204 *		1	=	6.160.214.023.204
Cost of sales and revenue	DR	3.339.267.470.227 *		-1	=	-3.339.267.470.227
Gross profit	CR	2.520.946.552.977				2.820.946.552.977

After correction

Item		Value		Weight		Result
Sales and revenue	CR	6.160.214.023.204 *		1	=	6.160.214.023.204
Cost of sales and revenue	DR	3.339.267.470.227 *		-1	=	-3.339.267.470.227
Gross profit	CR	2.820.946.552.977				2.820.946.552.977

If there is no error detected, the instance document creation is complete.
